

T-Top and Hard-Top Boat Shade Kit Instructions

RNR-Marine, Inc. is the top dealer of quality TTopCovers.com products (T-Top-Boat-Covers, T-Top-Storage-Curtains, Boat-Shade-Kit, etc.) in the United States. TTopCovers.com products are Manufactured and Warranted by LaPorte's Upholstery in North Charleston, SC.

1. Insert poles into rod holders near transom.
2. Locate pole securing strap and pass loop through or around cleat, handrail or U-bolt on transom. Pass grommet end through loop and pull tight:

3. Place the grommet end onto post on top of each pole:

4. Tighten strap. This will keep your pole and shade attached to your boat.
5. Identify shiny reflective side of shade and make sure it is facing towards the sky.

6. Locate the edge of shade which only has two corner connector straps (opposite the side that has 5 straps including the royal blue strap). Disconnect clip on corner connector strap and place through exposed webbing loop on top of pole and reconnect clip. Stretch shade to the other pole and disconnect clip on corner connector strap and place through exposed webbing loop on top of pole and reconnect.

7. Stretch shade towards Hard-Top frame and attach the royal blue webbing strap under the center of the Hard-Top. Make sure the T-top logo patch is facing down so the reflective side of the material is facing up. Below are a couple of examples on how to attach your shade to a T-top:

8. Connect the rest of the connector straps on either side to the T-top frame.
9. Use Velcro straps to wrap loose ends of connector straps.

T-top boat shades should be taken down after every use. They are not designed for rain protection, while under power or for permanent installation.

In some cases, you may also be able to use it as:

Slant Back

Bow Shade

Optional straps may be needed for these applications.
