### RNR-Marine Gear Loft Storage for T-Topless and Montauk-T-Topless Folding T-Tops

Charleston, SC, February 8, 2011 -- RNR-Marine announces the "**T-Topless Gear Loft**" storage option for its **T-Topless** and **Montauk-T-Topless** folding t-top line for center console, rigid inflatable and Boston Whaler® Montauk® and Dauntless® series boats.

The **T-Topless Gear Loft** laces under the raised area of the **T-Topless** or **Montauk-T-Topless** frame providing storage for up to 6 life preservers (PFDs), towels or other gear overhead. The loft is made of open-weave **PhiferTex®** PVC-coated polyester by Phifer, Inc., allowing gear to breath and stay dry and mildew free. The loft closes at the front and can be rotated forward with the top for storage.

*"The **T-Topless Gear Loft** answers boaters' requests for storage, providing a place to store gear like life preservers and towels, thus freeing up valuable storage compartments for other gear such as tackle, lines, food or coolers. The Gear Loft is a great solution to the limited storage on the Boston Whaler® Montauk, our most popular boat,"* said Ross Johnson, president of RNR-Marine.

Gear Loft Loaded with 5 Life Preservers

T-Topless with Full Gear Loft

PhiferTex® Breathable Mesh

The **T-Topless Gear Loft** is now available for \$99 (includes lacing and instructions) on RNR-Marine's web site: <http://RNR-Marine.com/Gear-Loft> and takes about 20 minutes to install.

### About RNR-Marine

Founded in 2004 by engineers with a passion to improve the products they use, RNR-Marine is committed to providing American-made "**Unique Products for Demanding Boaters**". RNR-Marine designs and manufactures the patent-pending **T-Topless** (<http://T-Topless.com>), **Montauk-T-Topless** (<http://Montauk-T-Topless.com>) and **Shadow** (<http://ShadowTop.com>) lines of folding, stainless steel T-Tops. Available in 16 different sizes/models to fit most 15 to 21 foot center console and rigid inflatable boats, these tops install in minutes on the boat's windshield grab rails without drilling ANY holes in the boat. The tops then fold down in seconds (or remove in 5 minutes) to fit the boat in a garage, saving the owner \$1,000's per year in storage fees.

RNR-Marine also manufactures the Flats-Top (<http://Flats-Top.com>) shade for flats-boats and skiffs.
